While being in a creative field I decided to try programming. It feels pretty similar, you should come up with an idea, communicate every detail with a client, find the right tools to complete it, and then spent a ton of time on a laptop just trying to create. I am just a regular guy who found coding very engaging and fulfilling and who now wants to dive into it and become a specialist at creating web applications with Django. Working in a team, creating projects I learned how important it is to be an engaging team member and always understand team goals.

EDUCATION

- Cybersecurity**
Lviv Polytechnic National University
2016 – 2020

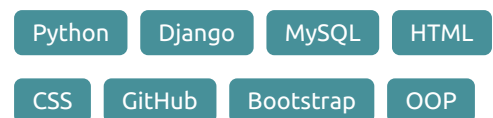

WORK EXPERIENCE

- Photographer/Videographer**
Epokha
2016 – Present
Achievements/Tasks
 - I am a part-time worker, making creative projects for a non-profit, my first team lead was an american so all the meetings and tasks were in English. Also about half of the clients were americans so I have a lot of experience communicating with foreigners in English.

- Web developer (freelance)**
Epokha
03/2020 – 04/2020
Achievements/Tasks
 - I developed a full working website using Wordpress, bought a domain name and deployed it all by myself.

SKILLS

PERSONAL PROJECTS

- Photography portfolio (04/2020 – 07/2020)
- I decided to build a personal photography portfolio website with Python and in that way learn Django, HTML, CSS and Bootstrap. This project felt like the most suitable for me. It is on my GitHub and also live at <https://tarikkus.pythonanywhere.com>

CERTIFICATES

- Django 3 - Full Stack Websites with Python
Web Development (06/2020 – 07/2020)
I finished this course on Udemy and got a certificate

LANGUAGES

English
