While being in a creative field I decided to try programming. It feels pretty similar, you should come up with an idea, find right tools to complete it and then spent a ton of time on a laptop just trying to recreate what you got in your mind and on paper. I am just a regular guy who found coding very engaging and fulfilling and who now wants to dive into it and become a specialist at creating web applications with Django. Working with a team, creating projects I learned how important it is to be an engaging team member and always understand teams goal.

EDUCATION

- Cybersecurity**
Lviv Polytechnic National University
2016 – 2020

WORK EXPERIENCE

- Photographer/Videographer**
Epokha
2016 – Present
Achievements/Tasks
 - I am a part-time worker, making creative projects for a non-profit, my first team lead was an american so all the meetings and tasks were in English. Also about half of the clians were americans so I have a lot of experience communicating with forginers in English.
- Web developer (freelance)**
Epokha
03/2020 – 04/2020
Achievements/Tasks
 - I developed a full working website using Wordpress, bought a domain name and deployed it all by myself.

SKILLS

PERSONAL PROJECTS

- Photography portfolio (11/2019 – Present)
- I decided to build a personal photography portfolio website with Python and in that way learn Django, HTML, CSS and Bootstrap. This project felt like the most suitable for me. It is on my GitHub. I just have to finish making photo gallery on front-end, fill it in with my photos and finilly deploy it to the world.

CERTIFICATES

- Django 3 - Full Stack Websites with Python
Web Development (06/2020 – 07/2020)
I finished this course on Udemy and got a certificate
